

1. A customer may bring multiple cars in for service.

2. A customer may bring each of their cars in for inspection. Each car may have multiple service requests.
e.g. service the lights, service the breaks, and etc. for the same car.
A car may not need service just because it was brought in.

3. A service request may be worked on by multiple mechanics. A mechanic may work on a single service request at once.

*. May be initially null (empty field in table).
